-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1 – 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. The term "substantially" in claims 1, 7 and 8 is a relative term, which renders the claim indefinite. The term "substantially" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. The term substantially means "not imaginary or of having substance". The phrase "substantially in a carrying direction" would be understood, as "in a non-imaginary carrying direction," which is an ambiguous term, since everything that is moved, would be carried in a non-imaginary direction.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1 – 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Maydan et al. (U. S. Patent 5,855,681 A).

7. In re claims 1, 7 and 8; Maydan, in the U. S. Patent 5,855,681 A; figures 1 – 29 and related text, discloses an inter-process carrying means 109 for carrying a container between the process modules, the container being capable of storing several intermediate products therein; an intra-process carrying means 102/112 for removing the intermediate products from the container and carrying the intermediate products within each process module in a single product state; and several of processing means 106 for performing the several processes, respectively, within each process module, wherein the several of processing means are arranged substantially in a carrying direction of the intermediate products, without arranging several of processing means for performing the same kinds of processes on the intermediate products in a group (Figure 4).

8. In re claim 2, Maydan discloses further including transfer means provided between the inter-process carrying means and the intra-process carrying means and having a buffering function of temporarily storing the intermediate products to be transferred therein (Figure 8).

9. In re claim 3, Maydan discloses wherein the inter-process carrying means is adapted to carry a container before the maximum number of intermediate products capable of being stored in the container is reached, and the intra-process carrying means selects the several of

Art Unit: 2823

intermediate products to be processed in the same next process module, stores the selected intermediate products in the container in a group, and transfers the container to the inter-process carrying means (Figure 4).

10. In re claim 4, 5 and 6, Maydan discloses wherein the intermediate products include plate-shaped members, semiconductor wafers and liquid crystal display devices (Columns 7 and 8).
